

Bridge Referral Application Auto Update Feature

The Bridge updates itself automatically.

If the app updates while you are logged off, you will **not** receive a notification that the app has been updated.

If you are using the application when an update becomes available, the following message will appear:

Options

- **install now** – click this button to start the update immediately. After the update completes, the app will restart.
- **remind me later** – click this button to clear the notification - the application will automatically update the next time the application starts up
