Use Case Exhibit

Use Case Name: Longitudinal Record

This Use Case Exhibit (“UCE”) is effective and binding upon the Participating Organization (“PO”) and subject to the Terms. HIN and PO are referred to herein collectively as “Parties” and individually as a “Party.”

1. Purpose. The purpose of this UCE is to set forth the requirements for PO to use HIN Services as a means for PO and TDSOs to send, receive, find, and use Message Content in the Longitudinal Record.

2. [RESERVED]

3. Definitions.

3.1. **Message Content** means:

- (i) Any data sent to HIN pursuant to any other Use Case
- (ii) A query for the presence of a Longitudinal Record; and/or
- (iii) The Longitudinal Record.

3.2. **Longitudinal Record** means a single comprehensive patient record comprised of Message Content from PO and/or TDSOs.

4. Use Case Details.

4.1. **Primary Use** Message Content may be used by PO for Treatment, Payment and/or Healthcare Operations, and to provide for an individual’s right of access all as consistent with the requirements set forth in HIPAA.

4.2. **Additional Permissible Use**

- 4.2.1** Notwithstanding any provision to the contrary in any other Use Case, HIN may store, send, use, and receive Message Content sent by PO as permitted by Applicable Laws and Standards.
- 4.2.2** HIN may use Message Content for any other Use Cases that require use of the Message Content.
- 4.2.3** HIN may use Message Content in the case of an emergency, such as public health crisis, act of terrorism, or natural disaster.
- 4.2.4** HIN may use Message Content to provide back up in the case of cyber terrorism or ransomware attack.

- 4.2.5 HIN may use Message Content to provide aggregate trending, probability distribution analysis, and may de-identify Message Content and use such de-identified Message Content consistent with Applicable Laws and Standards.

4.3. **Limitations on use** Message Content may not be used for competitive purposes. PO may send, receive, find, or use Message Content consistent with the terms herein and as otherwise permitted by the Agreement. The PO shall not share Message Content in a manner inconsistent with this UCE.

4.4. **Related Use Case Requirements** The UCIG sets forth the related use case requirements and corresponding Message Content. POs sending Message Content must enter into the following Use Cases: Admission Discharge Transfer Notifications, Health Provider Directory, Active Care Relationship Service, Common Key Service, Exchange Consolidated Clinical Document Architecture, Lab Orders-Results, Radiology Document Delivery, and Transcribed Document Delivery.

5. **Service Interruptions.** No variations identified.

6. **Responsibilities of the Parties**

6.1. **PO's Responsibilities as a Sender**

6.1.1. PO shall ensure that Message Content is a conforming message and is properly encoded and can be properly parsed.

6.2. **PO's Responsibilities as a recipient**

6.2.1. PO agrees that any PO Participants that have an Active Care Relationship with a patient may use or receive the Message Content for that patient, except in the case of a self-paid service where the patient has requested that no Patient Data be sent to Health Plans.

6.3. **HIN's Responsibilities**

6.3.1. HIN shall provide to the PO regular reporting of any failed Messages that do not meet the criteria for sending or viewing based on the UCIG.

6.3.2. HIN shall keep all training guides up-to-date and will inform the PO of any upgrades to the UCIG.

7. **Other Terms.**

7.1. **PO Contacts** PO will provide to HIN the appropriate contact information for this Use Case.

8. **Implementation Guide(s).** The Implementation Guide(s) links for this Use Case are provided at <https://mihin.org/implementation-guides/>.
