

---

MiHIN is organized and operated exclusively for charitable, scientific, and educational purposes within the meaning of Section 501(c)(3) of the Internal Revenue Code of 1986, as amended. MiHIN carries out its purposes through a variety of activities, including convening groups of interested stakeholders to develop policies related to the interoperability of electronic health information systems and to promote the exchange of electronic health information. Not only will this educate the healthcare industry and others about electronic health information exchange, but it will also facilitate groups of interested stakeholders to address barriers to achieving interoperability. In addition, it will provide data and analytic services that enable the identification of opportunities for quality, safety, and cost effectiveness improvements.

Established in 2021, the purpose of the Tier 3 Hospital Round Table is to work in partnership to create a shared voice amongst the hospital and health system stakeholders and to help guide MiHIN towards excellence in support of the hospitals/health systems and their respective provider organizations. Additionally, the Tier 3 Round Table's purpose is to provide feedback to MiHIN regarding new Use Cases and/or advancing Use Cases, services, and products offered by MiHIN to the Michigan Market.

The Round Table will meet monthly to communicate upcoming changes or enhancements to service delivery, to utilize the Round Table as a sounding board for new use cases or new project work as MiHIN will be held accountable to provide answers and clarity to the group and to hear first-hand from the Michigan Market as it relates to current interests and market trends.

**Collectively the Tier 3 Round Table aims to:**

- Clearly define and align on goals and objectives of all parties.
- Be a forum where hospital stakeholders can communicate shared affairs.
- Communicate changes or enhancements to a MiHIN service or product.
- Be a confidant for new use cases or identify a new need.
- Respect any confidential discussions held in the group or shared by other members.
- Provide input on the work products at specific milestones in the development process.
- Makes recommendations to MOAC with operational advice or approval of use cases and work products, as well as recommendations for new use cases.

While MiHIN is counting on its hospital members to be advocates for their respective organizations, we're relying on our Stakeholders to help hold us accountable to deliver clear solutions and to provide a strategic roadmap for a holistic view and obtain feedback. The goal of MiHIN's strategic roadmap is to assist with aligning all parties' resources more effectively and improve efficiency together as a whole.

The primary decision-making method will be consensus within the group. Depending on the consensus, MiHIN will move the outcome to the next step and each month, we will record and send meeting minutes and action items to all members of the group.

Participation may vary. This means two-three individuals from each organization can be invited to attend the Tier 3 Hospital Round Table meetings. In turn, this allows individuals to engage in conversations and provide feedback, largely if a specific meeting topic is of interest.

### **Eligibility requirements for Tier 3 Hospital Round Table:**

- The organization has signed a tier 3 hospital contract with MIHIN

To appoint individuals to represent your hospitals and/or Provider Organizations, or to request changes to your organization's representation, please email Megan Gibbs at [Megan.Gibbs@Mihin.org](mailto:Megan.Gibbs@Mihin.org). Additional representatives are welcome to attend the Tier 3 Round Table to engage in conversation and provide input, especially if there is a topic of interest.
