INTEROPERABILITY FOR ALL MICHIGAN RESIDENTS

How MiHIN is working with Michigan's 12 federally recognized tribes and an Urban Indian Health Organization to improve interoperability and enhance coordination of care for its Native American population.

ENSURE PATIENT PRIVACY

Native American health systems that join the MiHIN network can ensure that patient data is exchanged securely and in compliance with state and federal privacy regulations. MiHIN implements strict security and privacy protocols to protect patient information, such as using encryption and access controls to ensure that only authorized individuals have access to patient data.

REDUCED COSTS

MiHIN can help reduce healthcare costs by preventing duplicate tests and procedures, avoiding unnecessary hospital admissions, and reducing administrative expenses related to paper-based records.

24/7 SUPPORT

MiHIN's Help Desk ensures that you have the support that you need, when you need it. Our knowledgeable experts are dedicated to providing the timely and effective solutions you need, ensuring the smooth delivery of healthcare services.

IMPROVED PATIENT CARE

By joining the MiHIN network, Native American health systems will have access to a patient's complete medical history, including any previous diagnoses, medications, and allergies, which can improve the accuracy of diagnoses and the effectiveness of treatment.

ENHANCED CARE COORDINATION

MiHIN enables healthcare providers to easily share patient information with other providers involved in a patient's care, which can improve care coordination, reduce medical errors, and enhance the quality of care.

IMPROVED PUBLIC HEALTH

MiHIN can help identify and track public health trends and outbreaks, which can help Native American health systems and public health agencies respond more quickly and effectively to public health threats.

INCREASED EFFICIENCY

Being part of the MiHIN network can streamline administrative tasks, such as sending and receiving medical records and managing patient consent, which can help Native American health systems operate more efficiently and reduce administrative burden.

AMERICAN INDIAN HEALTH AND FAMILY SERVICES

MIHIN'S SERVICE OFFERINGS

How we securely connect care teams, hospitals, pharmacies, health insurance providers and public health to deliver the best care for our residents.

IMMUNIZATIONS & MCIR

The Michigan Health Information Network (MiHIN) works with the Michigan Care Improvement Registry (MCIR) to improve the exchange of immunization data between healthcare providers in Michigan. MiHIN provides secure data exchange capabilities to MCIR, allowing authorized providers to access immunization records in real-time. This improves care coordination and ensures patients receive the appropriate immunizations at the right time.

ADT NOTIFICATION SYSTEM

The ADT Notification System automates the process of notifying healthcare providers when a patient is admitted, discharged, or transferred from a hospital, improving care coordination and reducing healthcare costs. It collects data from various sources and sends real-time notifications to providers, resulting in improved patient care and reduced readmissions.

REFERRALSPLUS

ReferralsPlus is a system that automates and streamlines the process of referring patients to specialists and other healthcare providers, improving care coordination and reducing healthcare costs. It provides a centralized platform for managing referrals and real-time access to patient data and referral information.

MIGATEWAY

MiGateway is a secure messaging platform for healthcare providers that allows for the secure exchange of sensitive patient information, improving care coordination and reducing costs. It streamlines communication among healthcare providers and enhances patient outcomes.

CARECONVENE

CareConvene is a healthcare technology company that offers a secure communication platform for healthcare providers to collaborate and share patient information in real-time, improving care coordination and patient outcomes. The platform streamlines care delivery, reduces costs, and enhances patient satisfaction.

BY THE NUMBERS

As Michigan's state-designated HIE, we aggregate data from over:

159
HOSPITALS

310+
SKILLED NURSING FACILITIES

5K+
PRACTICES

1.7K+
PHARMACIES
