For the 2023 EHR reporting period in the CMS' Programs, Medicare Promoting Interoperability Program (PI) for eligible hospitals/CAHs, and Quality Payment Program (QPP)/Merit-Based Incentive Payment System (MIPS) for eligible clinicians, there are two available options to be considered as meeting requirements:

Option 1: Pre-production and Validation, which spans the registration through testing phase, including parallel validation.

Option 2: Validated Data Production, which means you are in Full Production and are approved to stop manual reporting.

- Eligible hospitals/CAHs and eligible clinicians must have a continuous 90-day reporting period prior to December 31, 2023. This means the last day the participant can begin their reporting period is October 3.

- Registration to submit eCR data must be completed within 60 days after the start of the EHR reporting period. For example, if using Q4 for the 90-day reporting period, registration would need to take place by ~December 1.

- Eligible hospitals/CAHs and eligible clinicians are considered in Active Engagement for 2023 by registering their intent to submit eCR data in HSTR and taking the necessary steps to be actively engaged. They can also claim an exclusion if one of the criteria are met (please see attachments found here: https://mihin.org/wp-content/uploads/2023/10/10-CY-2023-Electronic-Case-Reporting.pdf & https://mihin.org/wp-content/uploads/2023/10/2023MIPSPIMeasuresElectronicCaseReporting.pdf)

- To remain in Active Engagement, eligible hospitals/CAHs and MIPS eligible clinicians must respond to requests from the MDHHS-eCR Informatics Team within 30 days; failure to respond twice within a performance period would result in not meeting the measure.

Please reach out to the following for questions and concerns on:

eCR condition reporting, or the testing and validation process: MDHHS-eCR@Michigan.gov

eCR registrations: michelle.engler@altarum.org
